Boersianer's Comment on Business

By BOERSIANER.

It is pertinent to shake the chestput tree gently as regards Mr. Gary. The spokesman for the United States Steel Corporation is constitutionally conciliatory and by avocation a diplomatist. He will go far to conciliate dissatisfied employes and discontented customers. Concession, accommodstions are or were his watchwords. By these and with an urbane address he has conferred high prestige on a corporation which otherwise might have stood-in public estimationwhere the packing companies now

If, therefore, Mr. Gary now declines to do as the radical union leaders ask. It must be that he is absolutely sure of his position in more senses than one; assured that he has the more part of the workers with him; certain, in any event, that the given contest the corporation will win. The second postulate is comprehensible if it be a matter of resources, for never was an employer so strongly fortified. A hedge, however, must be noted in considering the phase of militancy. As Mr. Gary is far-sightedly-as well as suavely-diplomatic, there is the remote possibility of his permitting a tension in which he may invite President Wilson to intervene at the apparently despairing hour-and allow the President the inestimable credit of having forefended a serious atrike.
